This monograph reflects a systematic view of scientists - researchers on the issue of formation of intellectual work of future professionals of culture. Disclosed theoretical-methodological and technological bases of formation of culture of intellectual work of the future expert in the course of his training.

Considered modern theories of psycho-pedagogical activity reveal the essential basis of the culture of intellectual work and its structure, make it possible not only to identify the knowledge, skills, necessary specialist, but also to simulate the process of personality development from the standpoint of the implementation of the features of professional activity and taking into account the factors emerging in the organization of intellectual activities at the technological level. Through the formation of the culture of intellectual work is carried out the process of production of knowledge - an intellectual product, and intellectual forces are amplified internal professional opportunities multiply his knowledge and skills.

The book is intended for teachers, students, graduate students, research workers.
