Taylor & Francis Group

Welcome

Start exploring great academic research with Taylor & Francis Online.

The platform has:

- A clean, intuitive user interface
- Enhanced discoverability
- Easy-to-use search and browse functionalities
- More than 1,700 journals available

Getting Started

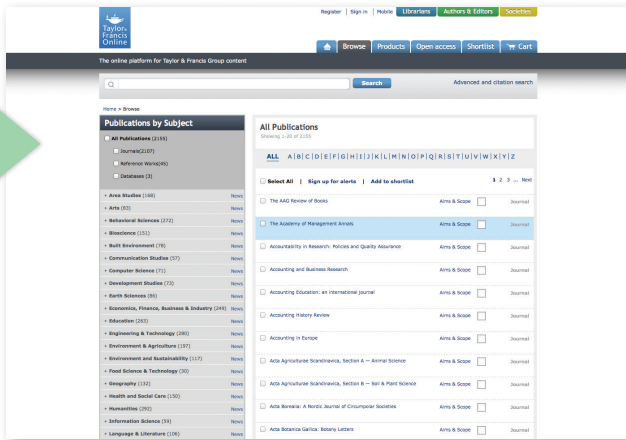

Register and Sign in

The first time you use Taylor & Francis Online, you will need to register. Click on **'Register'** at the top of the page and enter your details.

The screenshot shows the registration page for Taylor & Francis Online. At the top, there is a navigation bar with links for Register, Sign In, Mobile, Librarians, Authors & Editors, and Societies. Below this is a secondary navigation bar with Browse, Products, Open access, Shortlist, and Cart. A search bar is located below the navigation bars. The main heading is "Register with Taylor & Francis Online". There are two columns of text: "If you already have an account, then sign in now." and "If you are a librarian wishing to create an institutional account please contact support@tandfonline.com.". The registration form is a table with the following fields: Email address*, Confirm email address*, First Name*, Last Name*, Organization*, Country* (with a dropdown menu), Password*, and Confirm password*. A note at the bottom of the form says "Please remember to add info@tandfonline.com to your safe senders list" and "I agree to the terms and conditions*". A blue circular callout on the right side of the form contains the text: "To use the platform after this, you simply need to sign in with your email address and password."

Browse Content

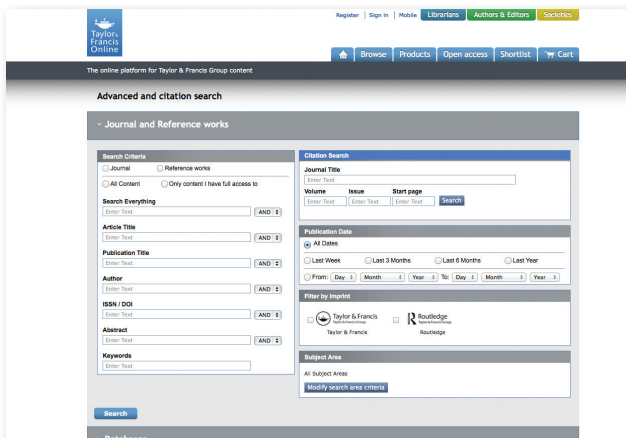

To browse journals by subject, select the **'Browse'** tab at the top of the homepage or click on your area of interest. From here, you can browse journals, reference works and databases.

Search and Advanced Search

The search bar at the top of the homepage allows you to speedily search the entire site.

The advanced search feature enables you to refine your search by citation, author, publication date and more. You can also save searches and view your search history.

Explore the Platform's Features

Taylor & Francis Group is dedicated to ensuring we meet your needs by continuously improving the Taylor & Francis Online platform.

Many key features are available when visiting a journal's homepage or an article page.

Share and Recommend Content

You have the option to share links via social media, recommend to a friend or librarian and add to shortlist, which adds the journal or article to a list of favorites. Within the journal or article page, select the icon that you wish to use.

Download Citations

You also have the option to download citations. These can then be imported by citation management software including [EndNote](#), [ProCite](#), [RefWorks](#) and [Reference Manager](#).

Sign up for Alerts

Sign up for new issue alerts using the **'Alert me'** button on journal homepages and article pages. You can choose to subscribe to email alerts and RSS feeds.

Most read	Most cited
The Revenge of Geography: What the Map Tells Us About Coming Conflicts and the Battle against Fate. Robert D. Kaplan. New York: Random House, 2012, xxii and 403pp., maps, notes and index. \$28.00 cloth (ISBN 978-1-4000-6963-5), \$20.42 eBook (ISBN 978-0-679-60483-9) Ron Johnston Volume 1, Issue 1, 2013	
Full Issue PDF Volume 1, Issue 1 Volume 1, Issue 1, 2013	
Filipino Diaspora: Emergent Geographies of Labor and Love Rachel Silvey Volume 1, Issue 2, 2013	

Find Related Articles

Most read and most cited articles are available to view on the right hand side of any journal homepage or article page. This helps you to find popular articles that may be of interest to you.

Google Translate

The 'Google Translate' button is another key feature of the site, enabling you to explore articles in your chosen language. Select the relevant language from the dropdown list on article pages.

Open Access

Taylor & Francis Online has a dedicated open access tab, found at the top of the site. This page features videos on open access and highlights recently published OA articles for you to enjoy.

CrossMark

CrossMark, developed by CrossRef, is designed to help you quickly determine whether the document you're viewing is the most recent version, and whether it's the publisher-maintained copy. By applying CrossMark to our articles, Taylor & Francis is committing to maintain the content we publish and to alert readers to changes if and when they occur.

Simply click on the **CrossMark logo** on the article pages to get updates and verify authenticity.

The screenshot shows a CrossMark verification window with a green checkmark and the text: "This document is current. Future updates - if any - will be listed below." Below this, it states: "This document is maintained by the publisher. Document: Full Issue PDF Volume 3, Issue 1. Published: The AAG Review of Books. Published: 2015-01-02. CrossRef DOI Link to Publisher-Maintained Copy: http://dx.doi.org/10.1080/2325548X.2015.985524".

DOI: 10.1080/2325548X.2015.985524
pages 1-57

Publishing models and article dates explained

Google Subscriber Links

Google Subscriber Links allow you to see in Google results whether you have access to a returned article, either through subscription access using your institution's IP range, or because it is open access or freely available. A direct access link is provided, straight onto Taylor & Francis Online.

Toll-free Linking

Toll-free Linking gives you free access to Taylor & Francis journal articles that are referenced by articles published in the Taylor & Francis journals that you subscribe to. It also applies to all of our open access journals and all articles published open access under the open select model.

DataCite Linking

Authors are increasingly opting to submit their supporting data to a repository, and in many cases they're required to do so as a condition of their funding. We've now made that data more accessible through bi-directional linking that takes users from the article to the related data and back again.

The DataCite link has been added to article abstracts. Where an author has deposited data to a repository supported by DataCite, a link to the data will appear under the article abstract, and where an author has deposited data to multiple repositories, links to all repositories will appear in a pop-up.

Additional Citation Source

To more accurately reflect the true number of citations an article has received, figures from the Web of Science and Scopus are now displayed on Taylor & Francis Online, alongside the existing CrossRef citation counts. Article citation count can differ between Web of Science, CrossRef and Scopus.

When a citation count is available from the sources, it will display next to the article with the source identified on both table of contents pages and on article pages. Citation sources will not appear if it is 0.

We are delighted with the new functionality available, including:

- Optimized interface for browsing, searching and reading
- Access your institution's holdings off campus by pairing your device
- Browse open access journals
- Personalize your homepage
- Create your own favorites list
- Save articles directly to your device to access them offline
- View full size figures and images
- Share articles via email or social networks
